

5.1.6 Associated Groups

Cardiac Surgery

Group leader

Ginel Iglesias, Antonino (FGS)

Researchers

Casellas Casanovas, Sandra (FGS)
 Irabien Ortiz, Angela (FGS)
 Montiel Serrano, Jose (FGS)
 Rosello Diez, Elena (FGS)
 Tauron Ferrer, Manel (FGS)

MAIN LINES OF RESEARCH

- Off-pump coronary artery bypass grafting surgery.
- Mitral repair surgery.
- Aorta pathology: aortic root surgery, aortic arch surgery (hybrid techniques).
- Follow-up of sutureless aortic valve prosthesis: Perceval S.
- Follow-up of surgical checklist implementation.
- Risk scores.
- Cardiac protection: Del Nido cardioplegia.
- Mini-invasive techniques: mini-sternotomy, mini-thoracotomy, MIDCABG surgery.
- Total arterial graft revascularization.
- New valvular transcatheter prosthesis: TAVI transaxillary approach (Portico), TAVI transapical approach (Accurate).
- Aortic valve repair.

SCIENTIFIC CHALLENGES

- Consolidation as a research group in different cardiac surgery-related fields, specific sutureless valve prosthesis, radial artery in myocardial revascularization, Different TAVI approach.
- Participation in the assessment and validation of new products employed in cardiac surgery: haemostatics, sutures.
- Collaboration with different national and international research teams involved in our lines of study: epicardial fat study (Endocrinology), calcium channels in auricular myocytes (ICCV).
