## Main Lines of Research

### Gastrointestinal Surgery

- ▶ Application of laparoscopic surgery in diseases of the spleen.
- ▶ Application of laparoscopic surgery in disorders of the oesophagogastric junction.
- ▶ Advanced application of colorectal laparoscopy.
- ▶ New stratification and treatment options in colorectal cancer.

### Oncological and Hepatobiliarypancreatic Surgery

- ▶ Surgery for liver metastasis in colorectal cancer.
- ▶ Development of diagnostic and therapeutic techniques in the global context of treatment for liver metastasis in colorectal carcinoma.
- ▶ Surgery for primary hepatic tumours: determination of efficient prognostic parameters for surgical

resection of hepatocarcinoma and likelihood of tumour recurrence after resection.

- ▶ Introduction of the laparoscopic methodology to biliary lithiasis.
- ▶ Surgery for sarcomas: participation in GIST research through the Spanish Sarcoma Research Group (GEIS) and other entities.
- ▶ Surgery for sarcomas: participation in the development and results of surgery for retroperitoneal tumours.

### Emergency Care

- ▶ Collaborative project on clinical safety for the introduction of safe practices for polytraumatized patients.

## Challenges

### Gastrointestinal Surgery

- ▶ Design, develop and manage a dry laboratory for endoscopic surgery, creating a multifunctional research and teaching space to conduct applied technological research in minimally invasive surgery.

### Hepatobiliarypancreatic Surgery

- ▶ Development of techniques to study liver volume and function.
- ▶ Development of experimental studies on the function and healing of bilio-intestinal sutures.
- ▶ Studies of the value of nutrition in patients undergoing aggressive surgery for highly debilitating cancer.
- ▶ Suitable stratification of GIST tumours in accordance with an anatomopathological classification.

- ▶ Viability of surgical interventions considering the likelihood of disease recurrence.

### Emergency Surgery

- ▶ Consolidation of a multidisciplinary group for polytraumatized patient care.

### Breast Surgery

- ▶ Technological innovations in surgery.
- ▶ Possible role of genetic studies in diagnosis and follow-up.

### Endocrinial and Cervical Surgery

- ▶ Technical innovations in surgery.

## Books or chapters with ISBN

- ▶ Monclova, Targarona, EM, Balague, C, R Luppi, C. Minimally invasive splenectomy for oncological diseases of the spleen. In: MA Cuesta. Minimally Invasive Upper Abdominal Surgery, Ed. Springer, 2017. ISBN 978-3-319-54301-7.

- ▶ Targarona, EM. Manual of the European Association of Endoscopic Surgery (EAES). Laparoscopic surgery of the spleen, In: Bonjer J. Surgical Principles of Minimally Invasive Procedures. Eds. Springer 2017. ISBN : 978-3-319-43194-9
