

INTERNAL PROMOTIN CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it's a priority to ensure that the recruitment of the most suitable candidate to cover a job is carried out through an open selection process, transparent and merit-based (OTM-R). Following these guidelines will promote the mobility of staff, the exchange of knowledge and, ultimately, the increase in the quality of teaching and research. Faithful to the commitment to the human resources strategy of the European Union, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee everyone equal access to a work placement. Therefore, the constitutional principles of equality, merit and capacity are followed, respecting in any case the national and international regulations in force in this area, specifically the European Charter of the Investigator and the Code of Conduct for the recruitment of Researchers (C&C). The principles of C & C are applicable for the recruitment of any staff of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of the "Excellence in R + D in Research" granted to the IIB de Sant Pau, since 2015.

HIR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Research in Endocrinology, Diabetes and Nutrition**:

R2A – Postdoc Junior

About the Unit / Group:

This multidisciplinary team is composed of more than 40 researchers, including neurologists, neuropsychologists, biologists, biochemists, engineers, and laboratory technicians.

It is a highly translational team that combines basic research with clinical research in humans to advance our understanding of these diseases. The group is very productive, generating publications and securing competitive resources. The team regularly mentors national and international residents, master's students, and pre and postdoctoral researchers. The group provides an excellent environment for the training of young researchers in a unique translational setting.

RESEARCH LINES:

- Identification and characterization of new biomarkers for diagnostic and prognostic assessment of patients with neurodegenerative diseases.
- Understanding the natural history of clinical progression and changes in biomarkers of Alzheimer's disease in individuals with Down syndrome.
- Unraveling the underlying genetic causes of neurodegenerative disorders and developing new genetic biomarkers to aid in the diagnosis and prognosis of the disease.
- Characterization of the molecular mechanisms underlying neurodegenerative dementias.
- Digital neuropathology applied to neurodegenerative diseases.
- The intersection between sleep, epilepsy, and Alzheimer's disease.
- Clinical trials in Alzheimer's disease and Down syndrome.

Essential requirements

- Minimum doctoral qualification required (less than 5 years ago)
- Oral and written knowledge of the two official languages of Catalonia or, failing that, the selected candidate must demonstrate, or undertake to acquire, within a period not exceeding one year, a correct knowledge of the two official languages in Catalonia.
- High level of English
- Intermediate level of office automation tools (Excel, Word, Power Point, etc).

Skills will be valued

- Experience with patients with dementia
- Experience with people with intellectual disabilities
- Experience in Research and Cohort Studies
- Experience in Neuroradiology

Functions

- Collaboration with patient care teams and conducting research studies and clinical trials.
- Carrying out diagnostic imaging tests.
- Provide support and advice to participants.

Offered

- Permanent contract
- Annual working day of 1,627.50 hours (37.5 hours/week)
- Remuneration according to agreement
- Neurobiology of Dementia Research Group

Documentation and deadline for submission

Interested parties should preferably deliver the documentation (1) in PDF, by e-mail to the Management of the Santa Creu i Sant Pau Hospital Research Institute Foundation, address ir_seleccio@santpau.cat , indicating the reference **2024/012**:

(1) Application letter and updated Curriculum Vitae

At the request of the Santa Creu i Sant Pau Hospital Research Institute Foundation, the candidates must present the documentation accrediting the merits mentioned in the curriculum vitae.

Applications will be resolved within a maximum period of one month from the end of the deadline for submission of documentation. At the end of this period, without having been notified of an express resolution, the interested parties will be entitled to understand that their applications have been rejected.

Santa Creu i Sant Pau Hospital Research Institute Foundation may declare this call for applications closed if, according to its criteria, the candidates does not meet the

SANT PAU
