

INTERNAL / EXTERNAL CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

HR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Molecular Pathology and Therapeutic Diseases of Ischemic Atherothrombotic Diseases Group**:

R1B- Predoctoral Researcher

About the Unit / Group:

The Molecular Pathology and Therapeutic Diseases of Ischemic Atherothrombotic Diseases Group, its main lines of research:

- Pathophysiological role of LRP family proteins in chronic diseases.
- Identification and characterization of transcription factors and genetic targets. Role of lipids and inflammation.
- Vascular impact of ischemia and angiogenesis in heart disease. Cell therapy.
- Investigating new targets to inhibit the transformation of silent atherosclerosis into ischemic syndromes: factor mediated angiogenic tissue change.

Essential requirements

- Minimum qualification required: Higher Education (University Degree)
- Be a PhD student enrolled and admitted to a doctoral programme
- Intermediate level of English
- Intermediate knowledge of office tools (excel, word, power point, etc).
- b,c,d functions to work with animals used for scientific purposes

Skills will be valued

- Experience in working with small (rodents) and large (pigs) experimental animals will be positively valued: organ isolation, blood extraction, administration of drugs and anaesthetics through different routes, etc.
- Experience in molecular biology techniques: Western blot, ELISAs, confocal and inverted microscopy, PCR, IHQ, flow cytometry, etc.
- Experience in cell biology techniques will be positively assessed: primary cultures and cell lines (especially blood cells).
- Experience in techniques for obtaining DNA, RNA, and protein from samples of animal tissue.
- Experience in miRNAs
- Experience in data analysis and bioinformatics.
- Oral and written knowledge of the two official languages of Catalonia or, failing that, the selected candidate must demonstrate, or undertake to acquire, within a period not exceeding one year, a correct knowledge of the two official languages in Catalonia.

Functions

- Identify disease biomarkers of cardio-metabolic disease in human and animal samples
- Assess different cardioprotective approaches aimed at reducing myocardial damage and lessening ventricular remodelling in animal models of acute myocardial infarction with/without comorbidities
- Search for imaging-related biomarkers to track cardiac response to treatment post-myocardial infarction
- Molecular/histological studies to identify cardioprotective signalling pathways and targets for intervention
- Study the immune-metabolic interaction in the setting of acute myocardial infarction and heart failure.
- Animal models of crossed-bone transplant: delve of the role of the bone marrow on cardiovascular disease
- Lipoprotein characterization (liver-heart axis)

Offered

- Predoctoral contract that will initially be linked to the project PLEC2021-007664, finançat per MCIN/AEI/10.13039/501100011033 i per la Unió Europea “NextGenerationEU”/PRTR”

- Annual workday of 1.627,50 hours (37,5 hours/week)
- Remuneration EPIF
- Research Group: Molecular and Therapeutic Pathology of Atherothrombotic and Ischemic Diseases

Documentation and deadline for submission

Interested parties should preferably deliver the documentation (1) in PDF, by e-mail to the Management of the Santa Creu i Sant Pau Hospital Research Institute Foundation, address ir_seleccio@santpau.cat , indicating the reference **2024/016**:

(1) Application letter and updated Curriculum Vitae

At the request of the Santa Creu i Sant Pau Hospital Research Institute Foundation, the candidates must present the documentation accrediting the merits mentioned in the curriculum vitae.

Applications will be resolved within a maximum period of one month from the end of the deadline for submission of documentation. At the end of this period, without having been notified of an express resolution, the interested parties will be entitled to understand that their applications have been rejected.

Santa Creu i Sant Pau Hospital Research Institute Foundation may declare this call for applications closed if, according to its criteria, the candidates does not meet the conditions that the Institution considers necessary to fill the position.

The interpretation of the requirements and their enforceability to the candidates will be exclusive to the Santa Creu i Sant Pau Hospital Research Institute Foundation.

**The deadline for submitting applications
will end on March 14th, 2024, at 3:00 p.m.**

Fundació Institut de Recerca de l'Hospital de la Santa Creu i Sant Pau, sited at C. Sant Quintí, 77-79, 08041, Barcelona, Tel: 93 291 90 50, NIF: G-60136934, as Data Controller and in compliance with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) and the Organic Law 3/2018 of 5th of December, on the protection of personal data and the guarantee of digital rights, will treat your data with the sole purpose of developing this call. The legal basis for this treatment is the article 6.1 a, c and f from the GDPR, giving that we will ask for your consent, the treatment is necessary for the application of precontractual measures and its necessary to satisfy the legitimate interests pursued by the Data Controller.

The data will be kept during the necessary time to develop the call. Data will be treated solely by that areas and services that are allowed to in accordance with their assigned competences and functions. There will be no data

cessions made unless there is a legal obligation to do so. You are entitled to exercise the rights of access, rectification, deletion, opposition, limitation and portability. In case you have any doubts, you can contact the data protection delegate at dpo_ir@santpau.cat. You also have the right to file a complaint to the relevant control authority.

PERMANENCE COMMITMENT: *Selected persons who will hold the summoned or vacant position, will not be able to apply for a new call until 1-year period has expired. In case of part-time job positions, this period will be of 6 months. In both cases, the period will compute from the date of publication of the resolution. The vacant summoned, and the ones that derive from it (intern movements), will be successively covered on the same proceeding among the submitted candidates to each particular call, regardless of whether this entails coverage of places in turns other than the call.*
