

INTERNAL PROMOTION CALL

The Institute

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is a scientific foundation which mission is to improve health and quality of life of the population, through the production and dissemination of scientific knowledge, training of researchers to an international standard, and promoting health innovation and the incorporation of medical advances in clinical practice and healthcare policies. Created in 1992, the institute was attached to the Autonomous University of Barcelona (UAB) in 2003, and since 2011 it is part of the Government of Catalonia's CERCA Programme.

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Information Systems Unit**:

A2B Senior Administrative management

About the Unit / Group:

The Information Systems Unit is the department responsible for the management, development and maintenance of the information systems used in the field of the organization. This unit is essential to ensure that information technology (IT) meets business needs, contributing to improving operational efficiency, decision-making and the achievement of the organization's objectives. Some of the typical responsibilities and functions of this unit include:

- **Development and Maintenance of Systems:** Create, implement and maintain the information systems necessary for the operation of the organization. This can include ERP (Enterprise Resource Planning) systems, database management systems, custom applications, and others.
- **Management of the Technological Infrastructure:** Supervise the technological infrastructure, which can cover servers, networks, storage devices and other components that allow the effective use of information systems.
- **Computer Security:** Implement security measures to protect sensitive information and ensure compliance with information security regulations. This can include access management, security monitoring, and incident response.
- **Technical Support:** Provide technical assistance and support to internal users, addressing technical problems, facilitating training and ensuring that systems are used efficiently.
- **Project Management:** Supervise projects related to information systems, from planning to implementation. This involves managing time, resources and communication with other departments or suppliers.
- **Technology Integration:** Ensure the effective integration of the various technologies used in the organization to optimize business processes and improve collaboration.
- **Strategic IT Planning:** Collaborate with the management of the organization to develop an information technology strategy that is aligned with business objectives and contributes to the growth and success of the organization.
- **Data Management:** Ensure the quality, integrity and availability of data throughout the organization, as well as comply with data protection regulations.
