

## INTERNAL / EXTERNAL CALL

### The Institute

The **Research Institute Foundation of the Hospital de la Santa Creu i Sant Pau** (IR Sant Pau) is a scientific foundation whose mission is to improve the health and quality of life of the population through the production and dissemination of scientific knowledge, the training of researchers at an international level, and the promotion of innovation and health by incorporating medical advances into clinical practice and healthcare policies. Created in 1992, it has been an excellence research center affiliated with the Autonomous University of Barcelona (UAB) since 2009 and has been a CERCA (Catalonia Research Centers) center since 2011.

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent, and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange, and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit, and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate within the NeuroBioLab platform:

**T2 - Research Technician**

## About the Platform:

The NeuroBioLab platform is one of the publicly contracted research support platforms (PSCT) at the Santa Creu i Sant Pau Hospital Research Institute Foundation. It is dedicated to advancing neuroscience research through the provision of high-quality technical services and expert support. The platform offers integrated services in neurophysiology, neuroimaging, and biomarkers, providing comprehensive assistance throughout the research process—from data acquisition to advanced analysis and interpretation.

In the field of neurophysiology, NeuroBioLab supports techniques such as polysomnography and actigraphy, among others. For biomarker studies, the platform offers analysis using advanced technologies including SIMOA, ELISA, and LUMIPULSE. In neuroimaging, it provides support for both the acquisition and preprocessing of magnetic resonance imaging (MRI) and positron emission tomography (PET) data. Thus, the platform serves as a key resource for researchers, fostering collaboration and ensuring high standards in data quality and scientific outcomes.

## Essential requirements

- Minimum qualification required: Bachelor's or Master's Degree
- Oral and written knowledge of the two official languages of Catalonia, or, failing that, the successful candidate will have to demonstrate, or promise to obtain, within a period not exceeding one year, a correct knowledge of the two official languages of Catalonia
