

INTERNAL / EXTERNAL CALL

The Institute

The **Research Institute Foundation of the Hospital de la Santa Creu i Sant Pau** (IR Sant Pau) is a scientific foundation whose mission is to improve the health and quality of life of the population through the production and dissemination of scientific knowledge, the training of researchers at an international level, and the promotion of innovation and healthcare by incorporating medical advances into clinical practice and health policies. Created in 1992, it has been an excellence research center affiliated with the Autonomous University of Barcelona (UAB) since 2009 and, since 2011, a CERCA center (Research Centers of Catalonia).

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

HR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** needs to incorporate at the **Associated Palliative Care Group** (Medical Oncology Service):

R2B PostDoc Senior

About the Unit / Group:

In 2008, the Palliative Care Research Group was established within the Research Institute (IR) of Hospital Sant Pau, under the direction of Dr. Antonio Pascual.

Since its creation and until his retirement, despite being a very small unit with a high clinical workload—which makes it difficult to carry out large-scale studies—the group has promoted participation in clinical research across various strategic lines of interest.

The main research line focuses on projects studying the effects of art therapy in end-of-life patients and in bereaved family members, particularly addressing the existential needs and resources of individuals facing suffering. The ongoing project on the benefits of art therapy for preventing and managing stress and burnout among healthcare professionals continues, exporting and applying the palliative care principles of self-care based on self-awareness as a protective factor in professional practice.

Additionally, an important telemedicine research line is being developed, involving the design of the content and clinical application of an electronic tool for evaluating patient-reported outcome measures (PROMs) regarding their health status (pending a feasibility pilot study).

Another area of interest is bioethics at the end of life, delving into the ethical aspects of advance directives and advance care planning.

Finally, we will begin a research line in nursing within palliative care.

Essential requirements

- Minimum required qualification: PhD (obtained more than 5 years ago)
- Postdoctoral experience with the ability to participate in and/or lead one or more research projects
- High level of proficiency in English and computer skills
Proficiency in the two official languages of Catalonia, both spoken and written. A C-level of Catalan is preferred; alternatively, the selected candidate must commit to acquiring proper proficiency in both languages within a maximum of one year.

Skills will be valued

- Systematic understanding of at least one field of study and mastery of the research associated with that field.
- Ability to conceive, design, implement, and adapt a research programme.
- Ability to write a scientific article suitable for publication in indexed international journals.

Functions

- Lead the execution of research projects within the Palliative Care Unit and in cooperation with other research groups.
- Leadership and mentorship: contribute to the long-term planning of the group.
- Project management: prepare proposals to obtain funding, manage budgets, and take responsibility for a specific line of research.
- Strategic development: develop a strategic vision for the field of palliative care research, identifying new opportunities.
- Collaboration and networking: establish and maintain a network of collaborators both within and outside the scientific community, and participate in committees organising academic events.

Offered

- Permanent contract assigned to a research line (business collaboration agreement with the Mémora Foundation, for an additional four (4) years starting on 24 May 2025).
- Annual working hours: 651 hours (15 hours/week).
- Salary as per agreement with the Mémora Foundation.
- Research Group: Palliative Care.
- Retroactively from December 1st, 2025
