

INTERNAL / EXTERNAL CALL

The Institute

The **Research Institute Foundation of the Hospital de la Santa Creu i Sant Pau** (IR Sant Pau) is a scientific foundation whose mission is to improve the health and quality of life of the population through the production and dissemination of scientific knowledge, the training of researchers at an international level, and the promotion of innovation and healthcare by incorporating medical advances into clinical practice and health policies. Created in 1992, it has been an excellence research center affiliated with the Autonomous University of Barcelona (UAB) since 2009 and, since 2011, a CERCA center (Research Centers of Catalonia).

For the Foundation, it is a priority to ensure that the most suitable candidate is hired to fill a job through an open, transparent and merit-based selection process (OTM-R). Following these guidelines, staff mobility, knowledge exchange and, ultimately, the increase in the quality of teaching and research will be enhanced. Faithful to our commitment to the European Union's human resources strategy, our institution's personnel selection and recruitment procedures are governed by a set of basic principles that guarantee equal access to employability for all. Therefore, the constitutional principles of equality, merit and ability are followed, respecting in all cases the national and international regulations in force in this area, specifically the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers (C&C). The principles of C&C are applicable to the recruitment of any personnel of the institution, regardless of their professional category. For this reason, our Foundation has obtained the recognition of "Excellence in R+D in Research" granted to the IIB Sant Pau, since 2015.

HR EXCELLENCE IN RESEARCH

The **Santa Creu i Sant Pau Hospital Research Institute Foundation** is seeking to incorporate at the **Oncologic Haematology and Transplantation**:

T4B- Senior Research Technician

About the Group:

The Cellular Immunotherapy and Gene Therapy Group (GITG) of the Hematology Department focuses on the study of genetically modified T cells expressing antigen-specific chimeric receptors (CAR) and their clinical application in patients with hematologic malignancies. The GITG group at IR-Sant Pau is a consolidated team that develops and manufactures Advanced Therapy Medicinal Products (CART) for the treatment of patients with lymphoid hematologic neoplasms.

In 2020, our group launched a Phase I clinical trial, the “first in Europe,” using CAR-T30 cells (HSP-CAR30) for patients with Hodgkin lymphoma, with Phase II currently ongoing. In 2023, a second clinical trial began in patients with refractory B-cell lymphomas using selected memory T cells expressing CAR19 (HSP-CAR19M).

The HSP-CAR30 and HSP-CAR19M products are fully manufactured at Sant Pau by the GITG group in compliance with good manufacturing practices.

The current research lines focus on the following aspects of CART immunotherapy:

- Evaluating the antitumor efficacy of memory T cell subsets.
- Studying genetically modified stem memory T cells with CAR.
- Developing innovative 4th generation CARs targeting antigens expressed in hematologic cancers.
- Conducting CART cell immunotherapy clinical trials in patients with lymphoid malignancies.

Essential requirements

- Minimum required qualification: PhD or specialty training (MIR, QUIR, FIR, BIR) or more than 4 years of demonstrable experience in the specific work area.
- Oral and written knowledge of both official languages of Catalonia or, failing that, the selected candidate must demonstrate, or commit to acquiring within no more than one year, an adequate command of both official languages of Catalonia.
- Advanced level of English.
- Advanced level in office software (Excel, Word, PowerPoint, etc).

Skills will be valued

- Knowledge of immunology, immunotherapy, tumour immunology assays and molecular biology (qPCR).
- Experience in CART therapy development.
- Experience in flow cytometry and cell culture.

Functions

- Control of advanced therapy medicinal products (CART) under GMP regulations.
- Manufacturing of lentiviral vectors under GMP regulations.
- Management of materials according to GMP regulations.
- Maintenance and inspection of equipment.
- Data interpretation and presentation at scientific meetings.

Offered

- Permanent contract linked to the research line: “Development of CART therapies for hematologic cancers”
- Annual work schedule: 1,627.5 hours (37.5 hours/week)
- Salary in accordance with collective agreement.
- Research Group: Oncologic Haematology and Transplantation.
